

# X-PIPS-M DATA SUMMARY

Progress through Calculus: 2017-19

## Abstract

A compilation of descriptive statistics of responses to the X-PIPS-M suite of surveys for students, student instructors, and faculty instructors of introductory mathematics courses. Data were obtained from Precalculus, Calculus 1, and Calculus 2 courses at 12 universities during the 2017-18 and 2018-19 academic years, as part of the Progress through Calculus research project (NSF DUE IUSE #1430540).

Ciera Street, Naneh Apkarian, Jessica Gehrtz, Rachel Tremaine,  
Victoria Barron, Matthew Voigt, & Jessica Ellis Hagman on  
behalf of the Progress through Calculus Research Team.

## Overview / Introduction

### Project Overview

Data for this report come from the *Progress through Calculus* (PtC) project ([maa.org/PtC](http://maa.org/PtC)), which was sponsored by the National Science Foundation (DUE IUSE #1430540) and run with support from the Mathematical Association of America. The project focused on the Precalculus to Calculus 2 (P2C2) course sequence, which is the course sequence generally required of undergraduate STEM majors. This multiyear project, begun in 2015, consisted of two phases. Phase 1 involved a survey of all university mathematics departments in the United States. The aim of this phase was to catalogue common practices, and in particular, to document the prevalence of program characteristics previously shown to support student success in Calculus 1 ([Bressoud, Mesa, & Rasmussen, 2015](#)). Results of this first phase have been published as a journal article ([Rasmussen et al., 2019](#)) and in a technical report like this one ([Apkarian & Kirin, 2017](#)). Phase 2 of the PtC project consisted of multi-year case studies of 12 selected mathematics programs. This report summarizes responses to surveys collected as part of Phase 2.

### Survey Design & Development

The surveys reported on here were co-developed with members of the SEMINAL project ([aplu.org/SEMINAL](http://aplu.org/SEMINAL)), and the text of these questions, along with a report of the development process, is available as a white paper ([Apkarian et al., 2019](#)). Given this availability, we omit a lengthy discussion of the survey development in this technical summary report. In brief, the X-PIPS-M refers to a suite of instruments created from postsecondary instructional practice surveys (PIPS) about mathematics (the *M*) for different stakeholders (the *X*). The core of these surveys draws on the *Postsecondary Instructional Practices Survey* for STEM instructors which was developed elsewhere (Walter et al., 2016). Our version amended the original items slightly for the mathematical context and contributed additional questions about context and attitudes. We also developed versions specifically for students, faculty instructors, and student instructors to capture different aspects of introductory mathematics education. Surveys generally consisted of (1) questions about the participant, including demographic and contextual questions; and (2) questions about course delivery and experience.

### Data Collection & Participants

Data were collected at 12 universities in each term of the 2017-18 academic year and the Fall term of 2019. Surveys were distributed to all instructors of, student instructors of, and students enrolled in mainstream P2C2 courses. Graduate students and undergraduate students who served as either instructor of record or teaching assistant were considered to be student instructors. For our purposes, “Precalculus” refers to courses which function as immediate prerequisites for single-variable calculus regardless of their official title; “Calculus 1” refers to a first course in single-variable calculus, and “Calculus 2” refers to subsequent courses in single variable calculus. The term “mainstream” indicates that a course functions as part of the prerequisite sequence for

additional upper-division mathematics courses; terminal courses that incorporate similar content were not included. Surveys were appropriately tailored to each context: students saw the exact name of their course throughout (indicated in this document as [course]) and students enrolled in courses without an accompanying lab/recitation component were not presented with questions about labs/recitations. Select items were presented based on responses to a previous question; this is indicated where relevant.

Surveys were distributed via email to all participants and the survey was completed electronically using Qualtrics. The research team contacted instructors and student instructors directly, while students were contacted by their instructors; this distribution was facilitated by course coordinators and program liaisons as fit the local context. Instructors were encouraged to offer extra credit to their students for accessing the survey, but this was not required and not all instructors offered such incentives.

Due to the study design and the nature of P2C2 programs, many participants appear more than once in the data. People are double counted if they responded multiple times, which might occur for (1) students across multiple terms; (2) instructors teaching more than one P2C2 course in a single term; (3) instructors teaching any P2C2 course across multiple terms in the study. For instructors who reported on more than one course they were teaching in a particular term, their demographic/contextual information is reported only once while each course-related response is reported separately. For people who responded to the survey multiple times for the same course in the same term, we marked these as duplicates and only report the responses from the most complete survey attempt for each participant.

## Reading this Report

This report proceeds in three parts. The student survey (S-PIPS) is presented first, starting on page 5; student instructor survey (U-GPIPS) results begin on page 29; faculty instructors (PIPS) results begin on page 43. Within each, we report first on participant characteristics (demographics, identity, and context) and then on responses to the questions about course delivery and experiences. Participant characteristics are aggregated, while course specific responses are separated into responses pertaining to Precalculus, Calculus 1, and Calculus 2.

Some response options and Likert statements have been abbreviated in tables for readability. This is made clear in the text describing the survey item, and when questions or statements have been abbreviated, they are indicated with an asterisk (\*). Exact wording of all items is available in the aforementioned white paper ([Apkarian et al., 2019](#)).

Depending on the survey question, tabulated data are reported in one of two ways to show both the numeric count and the proportion of respondents who selected particular choices. In condensed tables, responses are shown as *number (proportion)*; in extended tables a row of counts appears directly above a row of proportions. Proportions are either out of the total who responded to a particular question (single-response items) or out of the grand total (multiple-response items); any deviations from this are noted in the text.

## S-PIPS-M: Student Survey Results

The S-PIPS data contain responses from 19,191 undergraduate students from 12 universities across the nation. We first present the self-identified demographic and contextual information of these students, followed by students' reports of their experiences in their P2C2 courses.

### Student Identity & Individual Context

These questions asked about students' identity, including demographic information and academic context. Questions about Gender, Race and Ethnicity, and Sexual Orientation were presented as "select all that apply" items with the option to self-identify descriptors not on our lists. We intentionally provided more nuanced options than are generally used in demographic reports (e.g., the US census) as we value the complex nature of identity. Responses to these items were recoded for interpretability in this report; details are provided alongside each item.

#### Gender

Do you consider yourself to be (Select all that apply):

Cisgender Man	Cisgender Woman	Gender Non-Binary	Transgender	Transgender Man	Transgender Woman	Not reported
10045	7972	39	48	14	9	1064
0.523	0.415	0.002	0.003	0.001	0.000	0.055

*Survey response options: Man, Transgender, Woman, Not listed (please specify), Prefer not to disclose.*

*Selections of only Man, only Woman, or only Transgender are coded as Cisgender Man, Cisgender Woman, and Transgender respectively; selections of Transgender and Man or Transgender and Woman are coded as Transgender Man and Transgender Woman, respectively; selections of Man and Woman (with or without additional selections) or self-described non-binary gender identities (e.g., genderfluid, agender) are coded as Gender Non-Binary; selections of Prefer not to disclose and no selection were coded as Not reported.*

#### Race and Ethnicity

Do you consider yourself to be (Select all that apply):

Asian	1449 (0.076)
Alaska Native or Native American	70 (0.004)
Black or African American	1474 (0.077)
Hispanic or Latinx	2137 (0.111)
Middle Eastern or North African	648 (0.034)
Multiple Race/Ethnicity	2044 (0.107)

Native Hawaiian or Pacific Islander	42 (0.002)
White	9962 (0.519)
Not reported	1365 (0.071)

*Survey response options: Alaskan Native or Native American, Black or African American, Central Asian, East Asian, Hispanic or Latinx, Middle Eastern or North African, Native Hawaiian or Pacific Islander, Southeast Asian, South Asian, White, Not listed (please specify), Prefer not to disclose.*

*Selections of more than one of Central Asian, East Asian, Southeast Asian, South Asian without any other choices are coded as Asian; selections of multiple responses (aside from the previous) are coded as Multiple Race/Ethnicity; selections of Prefer not to disclose and no selection are coded as Not reported.*

## Sexual Orientation

Do you consider yourself to be (Select all that apply):

Straight	Gay	Lesbian	Bisexual	Asexual	Queer	Queer+	Straight+	Not reported
15618	234	109	698	495	73	169	115	1680
0.814	0.012	0.006	0.036	0.026	0.004	0.009	0.006	0.088

*Survey response options: Asexual, Bisexual, Gay, Lesbian, Queer, Straight (Heterosexual), Not listed (please specify), Prefer not to disclose.*

*Categories are based on research from Voigt (2020) where selections of exactly one listed option are not recoded; selections of Straight (Heterosexual) and one or more additional options are coded as Straight+; selections of more than one option but not Straight (Heterosexual) are coded as Queer+; selections of Prefer not to disclose and no selection are coded as Not reported.*

## Additional Context / Identity Markers

Do you consider yourself to be (Select all that apply):

International Student	1507 (0.079)
First-generation college student	4963 (0.259)
Commuter student	3234 (0.169)
Transfer student	1927 (0.1)
Student with a disability	558 (0.029)
Student athlete	973 (0.051)
Current or former English language learner	1003 (0.052)
Parent or guardian	135 (0.007)

---

## FAFSA and Pell Grants

Did you use FAFSA to apply for financial aid?

Yes	No	Not reported
13,164 (0.686)	4102 (0.214)	1925 (0.1)

Did you receive a free grant (e.g., Pell Grant)? [Shown only to the 13,164 who responded “Yes” to the previous].

Yes	No	I don’t know	Not reported
5600 (0.425)	4933 (0.375)	2086 (0.159)	545 (0.041)

---

## Work Hours Per Week

Approximately how many hours per week did you work at a job this term?

0	1 – 5	6 – 10	11 – 15	16 – 20	21 – 30	>30	Not reported
9943	1067	1417	1224	1516	1309	1013	884
0.541	0.058	0.077	0.067	0.083	0.071	0.055	0.048

---

## Class Standing

What is your class standing?

First Year	Sophomore	Junior	Senior	Other	Not reported
10359	4885	2113	678	209	176
0.562	0.265	0.115	0.037	0.011	0.01

---

## STEM Intention

Have you declared, or do you intend to declare, a STEM (science, technology, engineering, or mathematics) major?

Yes	No	Unsure	Not reported
13121	3386	1520	364
0.713	0.184	0.083	0.02

---

## Math Preparation

Do you think your previous math courses adequately prepared you for [current course]?

Yes	No
15010	3352
0.817	0.183

## Student Experiences

These questions of the survey relate to the students' reports of their experiences in their Precalculus, Calculus I, and Calculus II courses. The respondents totaled 7136 in Precalculus, 6888 in Calculus I, and 7136 in Calculus II.

### Percentages of Class Time

What percent of regular class time, over the whole term, did you spend... [must total 100]

	n	mean	sd	median
<b>All Students</b>				
<i>Working on tasks individually</i>	19063	23.22	23.08	17
<i>Working on tasks in small groups</i>	19063	11.77	16.25	5
<i>Engaging in whole class discussion</i>	19063	14.49	16.26	10
<i>Listening to the instructor lecture or solve problems</i>	19063	50.52	28.25	50
<b>Precalculus Students</b>				
<i>Working on tasks individually</i>	7085	28.51	25.55	24
<i>Working on tasks in small groups</i>	7085	13.13	18.46	5
<i>Engaging in whole class discussion</i>	7085	15.46	16.88	10
<i>Listening to the instructor lecture or solve problems</i>	7085	42.9	27.33	41
<b>Calculus 1 Students</b>				
<i>Working on tasks individually</i>	6819	21.41	21.96	15
<i>Working on tasks in small groups</i>	6819	9.963	14.55	3
<i>Engaging in whole class discussion</i>	6819	13.56	15.74	10
<i>Listening to the instructor lecture or solve problems</i>	6819	55.07	28.13	52
<b>Calculus 2 Students</b>				
<i>Working on tasks individually</i>	5159	18.36	19.19	13
<i>Working on tasks in small groups</i>	5159	12.27	14.87	8
<i>Engaging in whole class discussion</i>	5159	14.4	16	10
<i>Listening to the instructor lecture or solve problems</i>	5159	54.97	27.41	52

## Percentages of Recitation/Lab Time

What percent of regular **recitation/lab time**, over the whole term, did you spend... [must total 100]

	n	mean	sd	median
<b>All Students</b>				
<i>Working on tasks individually</i>	7040	29.94	28.84	24
<i>Working on tasks in small groups</i>	7040	41.19	32.82	40
<i>Engaging in whole class discussion</i>	7040	9.82	14.11	2
<i>Listening to the instructor lecture or solve problems</i>	7040	19.05	23.07	10
<b>Precalculus Students</b>				
<i>Working on tasks individually</i>	1583	33.55	32.61	25
<i>Working on tasks in small groups</i>	1583	48.95	32.21	50
<i>Engaging in whole class discussion</i>	1583	7.196	12.43	0
<i>Listening to the instructor lecture or solve problems</i>	1583	10.3	16.21	0
<b>Calculus 1 Students</b>				
<i>Working on tasks individually</i>	3929	30.11	27.7	25
<i>Working on tasks in small groups</i>	3929	38.57	32.22	35
<i>Engaging in whole class discussion</i>	3929	10.51	14.3	5
<i>Listening to the instructor lecture or solve problems</i>	3929	20.81	23.26	13
<b>Calculus 2 Students</b>				
<i>Working on tasks individually</i>	1528	25.8	26.98	20
<i>Working on tasks in small groups</i>	1528	39.87	33.76	35
<i>Engaging in whole class discussion</i>	1528	10.76	14.91	4.5
<i>Listening to the instructor lecture or solve problems</i>	1528	23.57	26.09	15

## Overall Experience

Indicate the degree to which the following statements describe your experience in [course]:

		Never	Minimally	Somewhat	Mostly	Very
The test questions focus on important facts and definitions from the course.	PC	267	562	1517	2346	2399
		0.038	0.079	0.214	0.331	0.338

## U-GPIPS: Student Instructor Survey

The U-GPIPS data contain 331 responses from undergraduate and graduate student instructors from twelve universities across the United States. Of these responses, 294 come from graduate student instructors, 34 from undergraduate student instructors, and 3 from student instructors who did not report their current degree program. We first present the self-identified demographic information of these students.

As noted in the introduction to this report, instructors responded for each course they were teaching in a particular term. In the identity and context portion of this report, instructors are counted only once per term; in the course-specific information their responses are reported separately for each *course* they were teaching at the time they completed the survey.

### Student Instructor Identity & Individual Context

These questions asked about student instructors' identity, including demographic information and academic context. Questions about Gender, Race and Ethnicity, and Sexual Orientation were presented as "select all that apply" items with the option to self-identify descriptors not on our lists. We intentionally provided more nuanced options than are generally use in demographic reports (e.g., the US census) as we value the complex nature of identity. Responses to these items were recoded for interpretability in this report; details are provided alongside each item.

### Degree and Career Aspirations

What degree(s) or certifications do you intend to obtain from [your institution]? Mark all that apply.

B.A./B.S.	50 (0.151)
Teaching certification/credential	8 (0.024)
M.A./M.S. in mathematics	81 (0.245)
M.A./M.S. in mathematics education	6 (0.018)
Ph.D. in mathematics	203 (0.613)
Ph.D. in mathematics education	30 (0.091)
Ed.D.	1 (0.003)
Other	11 (0.033)

What is your intended career trajectory?

Academic position at a 4-year college or university – teaching focused	93 (0.347)
Academic position at a 4-year college or university – research focused	112 (0.418)
Academic position at a 2-year college	5 (0.019)

Non-academic position (industry, government, etc.)	34 (0.127)
Other (please explain)	24 (0.09)

## Gender

Do you consider yourself to be (Select all that apply):

Cisgender Man	Cisgender Woman	Gender Non-binary	Transgender	Transgender Man	Transgender Woman	Not reported
165	113	1	2	0	0	50
0.498	0.341	0.003	0.006	0.000	0.000	0.151

*Survey response options: Man, Transgender, Woman, Not listed (please specify), Prefer not to disclose.*

*Selections of only Man, only Woman, or only Transgender are coded as Cisgender Man, Cisgender Woman, and Transgender respectively; selections of Transgender and Man or Transgender and Woman are coded as Transgender Man and Transgender Woman, respectively; selections of Man and Woman (with or without additional selections) or self-described non-binary gender identities (e.g., genderfluid, agender) are coded as Gender Non-Binary; selections of Prefer not to disclose and no selection were coded as Not reported.*

## Race and Ethnicity

Do you consider yourself to be (Select all that apply):

Asian	62 (0.187)
Alaska Native or Native American	0 (0.000)
Black or African American	8 (0.024)
Hispanic or Latinx	8 (0.024)
Middle Eastern or North African	5 (0.015)
Multiple Race	16 (0.048)
Native Hawaiian or Pacific Islander	0 (0.000)
White	180 (0.544)
Not reported	52 (0.157)

*Survey response options: Alaskan Native or Native American, Black or African American, Central Asian, East Asian, Hispanic or Latinx, Middle Eastern or North African, Native Hawaiian or Pacific Islander, Southeast Asian, South Asian, White, Not listed (please specify), Prefer not to disclose.*

*Selections of more than one of Central Asian, East Asian, Southeast Asian, South Asian without any other choices are coded as Asian; selections of multiple responses (aside from*

*the previous) are coded as Multiple Race/Ethnicity; selections of Prefer not to disclose and no selection are coded as Not reported.*

## Sexual Orientation

Do you consider yourself to be (Select all that apply):

Straight	Gay	Lesbian	Bisexual	Asexual	Queer	Queer+	Straight+	Not reported
205	7	0	19	5	1	3	2	89
0.619	0.021	0.000	0.057	0.015	0.003	0.009	0.006	0.269

*Survey response options: Asexual, Bisexual, Gay, Lesbian, Queer, Straight (Heterosexual), Not listed (please specify), Prefer not to disclose.*

*Categories are based on research from Voigt (2020) where selections of exactly one listed option are not recoded; selections of Straight (Heterosexual) and one or more additional options are coded as Straight+; selections of more than one option but not Straight (Heterosexual) are coded as Queer+; selections of Prefer not to disclose and no selection are coded as Not reported.*

## Additional Context / Identity Markers

Do you consider yourself to be (Select all that apply):

International Student	80 (0.242)
First-generation college student	72 (0.218)
First-generation higher education	87 (0.263)
Student with a disability	6 (0.018)
English language learner	45 (0.136)
Parent or guardian	14 (0.042)

## Course Specific Information

This section describes the participants' perceptions of their role in Precalculus, Calculus I, and/or Calculus II (it may be the case that one participant taught more than one of the above courses during the semester). Each result will be shown in the order Precalculus, Calculus I, Calculus II.

### Course Role

What is your official role with regards to [course]?

	Instructor of record/ primary instructor	Recitation/discussion/lab section leader	Other
PC	44 0.746	12 0.203	3 0.051
C1	77 0.481	82 0.512	1 0.006
C2	56 0.602	37 0.398	0 0.000

### Decisions about the course

How are most decisions about course content (e.g. syllabi, exams, homework, pacing, grading) made for [course]? Clarify if you wish.

	I make most decisions	I am part of a team that makes most decisions	Someone else makes most decisions
PC	1 0.017	25 0.431	32 0.552
C1	17 0.106	40 0.25	103 0.644
C2	21 0.226	22 0.237	50 0.538

How are most decisions about instructional approach (e.g., use of clickers, group work, active learning) made for [course]? Clarify if you wish.

	I make most decisions	I am part of a team that makes most decisions	Someone else makes most decisions
PC	21 0.356	16 0.271	22 0.373
C1	71 0.449	37 0.234	50 0.316
C2	55 0.585	15 0.16	24 0.255

## Percentages of Class Time

When you are teaching [course], what percent of that time do students spend... [must total 100]

	n	mean	sd	median

<i>Working on tasks individually</i>	94	9.043	10.07	6
<i>Working on tasks in small groups</i>	94	30.03	30.71	20
<i>Engaging in whole class discussion</i>	94	8.883	9.065	6
<i>Listening to the instructor lecture or solve problems</i>	94	52.04	29.58	60

## Classroom Experience

Please indicate the degree to which the following statements are descriptive of your teaching.

		Not at all	Minimally	Somewhat	Mostly	Very
I guide students through major topics as they listen:	PC	3	7	8	27	12
		0.053	0.123	0.14	0.474	0.211
	C1	1	9	32	58	52
		0.007	0.059	0.211	0.382	0.342
	C2	1	7	15	36	31
		0.011	0.078	0.167	0.4	0.344

		Not at all	Minimally	Somewhat	Mostly	Very
I provide activities that connect course content to my students' lives and future work:	PC	6	16	18	7	10
		0.105	0.281	0.316	0.123	0.175
	C1	24	37	48	31	15
		0.155	0.239	0.31	0.2	0.097
	C2	11	21	32	19	8
		0.121	0.231	0.352	0.209	0.088
My syllabus contains the specific topics that will be covered in every class session:	PC	8	9	7	9	23
		0.143	0.161	0.125	0.161	0.411
	C1	18	16	17	37	60
		0.122	0.108	0.115	0.25	0.405
	C2	12	9	13	21	36
		0.132	0.099	0.143	0.231	0.396
I provide students with immediate feedback on their work during class (e.g., student response systems; short quizzes):	PC	14	4	13	20	6
		0.246	0.07	0.228	0.351	0.105
	C1	23	29	30	34	38
		0.149	0.188	0.195	0.221	0.247
	C2	15	22	11	23	20
		0.165	0.242	0.121	0.253	0.22
I structure my course with the assumption that most of the students have little useful knowledge of the topics:	PC	2	7	16	17	14
		0.036	0.125	0.286	0.304	0.25
	C1	2	17	43	56	35
		0.013	0.111	0.281	0.366	0.229
	C2	2	13	21	31	22
		0.022	0.146	0.236	0.348	0.247
I use student assessment results to guide the direction of my instruction during the semester:	PC	6	8	12	16	15
		0.105	0.14	0.211	0.281	0.263
	C1	16	18	39	41	38
		0.105	0.118	0.257	0.27	0.25
	C2	12	13	20	24	22
		0.132	0.143	0.22	0.264	0.242

		Not at all	Minimally	Somewhat	Mostly	Very
I ask students to respond to questions during class time:	PC	1	5	13	38	1
		0.018	0.088	0.228	0.667	0.018
	C1	5	21	42	89	5
		0.032	0.134	0.268	0.567	0.032
	C2	1	5	10	25	50
		0.011	0.055	0.11	0.275	0.549
I use student questions and comments to determine the focus and direction of classroom lessons:	PC	2	7	13	21	14
		0.035	0.123	0.228	0.368	0.246
	C1	6	13	37	56	42
		0.039	0.084	0.24	0.364	0.273
	C2	2	5	27	36	21
		0.022	0.055	0.297	0.396	0.231
In my class a variety of means (models, drawings, graphs, symbols, simulations, tables, etc.) are used to represent course topics and/or solve problems:	PC	1	3	12	23	18
		0.018	0.053	0.211	0.404	0.316
	C1	4	13	35	47	58
		0.025	0.083	0.223	0.299	0.369
	C2	6	3	27	30	25
		0.066	0.033	0.297	0.33	0.275
I structure class so that students explore or discuss their understanding of concepts before direct instruction:	PC	8	22	13	11	3
		0.14	0.386	0.228	0.193	0.053
	C1	24	35	45	31	20
		0.155	0.226	0.29	0.2	0.129
	C2	20	18	25	21	7
		0.22	0.198	0.275	0.231	0.077
My class sessions are structured to give students a clear/structured set of notes:	PC	4	5	7	21	20
		0.07	0.088	0.123	0.368	0.351
	C1	16	15	31	41	50
		0.105	0.098	0.203	0.268	0.327
	C2	5	9	16	34	27
		0.055	0.099	0.176	0.374	0.297

		Not at all	Minimally	Somewhat	Mostly	Very
I structure class so that students talk with one another about course topics:	PC	2	10	12	18	14
		0.036	0.179	0.214	0.321	0.25
	C1	11	21	36	37	52
		0.07	0.134	0.229	0.236	0.331
	C2	7	9	26	30	19
		0.077	0.099	0.286	0.33	0.209
I structure class so that students constructively criticize one another's ideas:	PC	10	13	23	8	3
		0.175	0.228	0.404	0.14	0.053
	C1	42	41	43	22	9
		0.268	0.261	0.274	0.14	0.057
	C2	19	25	24	17	6
		0.209	0.275	0.264	0.187	0.066
I structure class so that students discuss their mathematical difficulties with other students:	PC	7	7	17	19	8
		0.121	0.121	0.293	0.328	0.138
	C1	20	21	48	33	34
		0.128	0.135	0.308	0.212	0.218
	C2	10	15	27	27	12
		0.11	0.165	0.297	0.297	0.132
I structure class so that students work on problems individually during class:	PC	13	9	20	11	4
		0.228	0.158	0.351	0.193	0.07
	C1	29	45	48	19	15
		0.186	0.288	0.308	0.122	0.096
	C2	18	27	17	18	11
		0.198	0.297	0.187	0.198	0.121
I structure class so that students work together in pairs or small groups:	PC	4	7	11	16	20
		0.069	0.121	0.19	0.276	0.345
	C1	13	18	30	34	62
		0.083	0.115	0.191	0.217	0.395
	C2	9	15	17	18	32
		0.099	0.165	0.187	0.198	0.352

		Not at all	Minimally	Somewhat	Mostly	Very
I structure class so that more than one approach to solving a problem is discussed:	PC	2	2	11	25	17
		0.035	0.035	0.193	0.439	0.298
	C1	1	12	42	57	43
		0.006	0.077	0.271	0.368	0.277
	C2	1	3	19	43	24
		0.011	0.033	0.211	0.478	0.267
I provide time for students to reflect about the processes they use to solve problems:	PC	1	5	12	28	11
		0.018	0.088	0.211	0.491	0.193
	C1	8	12	59	43	33
		0.052	0.077	0.381	0.277	0.213
	C2	2	16	29	30	14
		0.022	0.176	0.319	0.33	0.154
I give students frequent assignments worth a small portion of their grade:	PC	6	2	8	15	25
		0.107	0.036	0.143	0.268	0.446
	C1	15	14	36	44	46
		0.097	0.09	0.232	0.284	0.297
	C2	11	8	12	24	36
		0.121	0.088	0.132	0.264	0.396
I expect students to make connections between related ideas or concepts when completing assignments:	PC	1	3	13	22	18
		0.018	0.053	0.228	0.386	0.316
	C1	1	13	32	68	41
		0.006	0.084	0.206	0.439	0.265
	C2	0	2	15	46	28
		0	0.022	0.165	0.505	0.308
I provide feedback on student assignments without assigning a formal grade:	PC	21	18	12	5	1
		0.368	0.316	0.211	0.088	0.018
	C1	53	45	25	19	11
		0.346	0.294	0.163	0.124	0.072
	C2	30	24	14	13	10
		0.33	0.264	0.154	0.143	0.11

		Not at all	Minimally	Somewhat	Mostly	Very
Test questions focus on important facts and definitions from the course:	PC	3	7	9	18	20
		0.053	0.123	0.158	0.316	0.351
	C1	3	16	24	57	49
		0.02	0.107	0.161	0.383	0.329
	C2	2	6	25	32	25
		0.022	0.067	0.278	0.356	0.278
Test questions require students to apply course concepts to unfamiliar situations:	PC	7	18	17	8	6
		0.125	0.321	0.304	0.143	0.107
	C1	14	28	44	34	30
		0.093	0.187	0.293	0.227	0.2
	C2	5	18	26	22	19
		0.056	0.2	0.289	0.244	0.211
Test questions contain well-defined problems with one correct solution:	PC	4	3	10	14	27
		0.069	0.052	0.172	0.241	0.466
	C1	2	3	25	56	64
		0.013	0.02	0.167	0.373	0.427
	C2	1	2	24	32	30
		0.011	0.022	0.27	0.36	0.337
I use a grading curve as needed to adjust student scores:	PC	23	11	10	9	4
		0.404	0.193	0.175	0.158	0.07
	C1	54	22	30	19	25
		0.36	0.147	0.2	0.127	0.167
	C2	25	14	21	14	16
		0.278	0.156	0.233	0.156	0.178
A wide range of students respond to my questions in class:	PC	2	16	23	11	6
		0.034	0.276	0.397	0.19	0.103
	C1	7	29	61	42	17
		0.045	0.186	0.391	0.269	0.109
	C2	1	13	36	29	12
		0.011	0.143	0.396	0.319	0.132

		Not at all	Minimally	Somewhat	Mostly	Very
I know most of my students by name:	PC	3	5	6	11	32
		0.053	0.088	0.105	0.193	0.561
	C1	4	7	14	15	116
		0.026	0.045	0.09	0.096	0.744
	C2	0	3	8	14	66
		0	0.033	0.088	0.154	0.725
When calling on students in class, I use randomized response strategies (e.g., picking names from a hat):	PC	34	12	7	2	3
		0.586	0.207	0.121	0.034	0.052
	C1	92	27	19	11	7
		0.59	0.173	0.122	0.071	0.045
	C2	53	15	11	8	4
		0.582	0.165	0.121	0.088	0.044
I structure class to encourage peer-to-peer support among students	PC	4	9	12	18	13
		0.071	0.161	0.214	0.321	0.232
	C1	17	27	36	30	46
		0.109	0.173	0.231	0.192	0.295
	C2	9	15	25	23	19
		0.099	0.165	0.275	0.253	0.209
There is a sense of community among the students in my class:	PC	2	10	18	19	7
		0.036	0.179	0.321	0.339	0.125
	C1	6	11	45	61	34
		0.038	0.07	0.287	0.389	0.217
	C2	0	5	36	27	23
		0	0.055	0.396	0.297	0.253
I require students to work in predetermined or randomized groups:	PC	22	6	9	7	13
		0.386	0.105	0.158	0.123	0.228
	C1	38	30	26	27	34
		0.245	0.194	0.168	0.174	0.219
	C2	32	15	12	11	21
		0.352	0.165	0.132	0.121	0.231

		Not at all	Minimally	Somewhat	Mostly	Very
I use strategies that have been shown to support students from underrepresented groups:	PC	11	16	14	9	7
		0.193	0.281	0.246	0.158	0.123
	C1	36	35	44	26	8
		0.242	0.235	0.295	0.174	0.054
	C2	20	25	22	10	8
		0.235	0.294	0.259	0.118	0.094
I consider students' thinking/understanding when planning lessons:	PC	2	2	5	25	23
		0.035	0.035	0.088	0.439	0.404
	C1	3	12	21	51	68
		0.019	0.077	0.135	0.329	0.439
	C2	3	0	12	30	46
		0.033	0	0.132	0.33	0.505
I use a variety of approaches (e.g., questioning, discussion, formal/informal assessments) to gauge where my students are in their understanding of concepts:	PC	2	1	12	21	21
		0.035	0.018	0.211	0.368	0.368
	C1	5	17	35	50	48
		0.032	0.11	0.226	0.323	0.31
	C2	1	8	33	25	24
		0.011	0.088	0.363	0.275	0.264
I understand students' previous conceptions, skills, knowledge, and interests related to a particular topic:	PC	1	5	19	23	10
		0.017	0.086	0.328	0.397	0.172
	C1	6	16	50	61	23
		0.038	0.103	0.321	0.391	0.147
	C2	2	8	27	39	15
		0.022	0.088	0.297	0.429	0.165
I explain concepts in this class in a variety of ways:	PC	1	0	11	28	18
		0.017	0	0.19	0.483	0.31
	C1	1	4	34	69	48
		0.006	0.026	0.218	0.442	0.308
	C2	0	2	15	39	34
		0	0.022	0.167	0.433	0.378

		Not at all	Minimally	Somewhat	Mostly	Very
I adjust my teaching based upon what students currently do or do not understand:	PC	2	3	13	17	22
		0.035	0.053	0.228	0.298	0.386
	C1	0	6	29	54	67
		0	0.038	0.186	0.346	0.429
	C2	1	3	14	39	34
		0.011	0.033	0.154	0.429	0.374
I give feedback on homework, exams, quizzes, etc.:	PC	3	3	7	22	23
		0.052	0.052	0.121	0.379	0.397
	C1	4	10	21	40	80
		0.026	0.065	0.135	0.258	0.516
	C2	4	2	9	26	50
		0.044	0.022	0.099	0.286	0.549
I structure class so that students share their ideas (or their group's ideas) during whole class discussions:	PC	5	5	18	17	12
		0.088	0.088	0.316	0.298	0.211
	C1	15	33	40	47	21
		0.096	0.212	0.256	0.301	0.135
	C2	6	21	21	32	10
		0.067	0.233	0.233	0.356	0.111
I use strategies to encourage participation from a wide range of students:	PC	2	2	20	24	9
		0.035	0.035	0.351	0.421	0.158
	C1	4	22	49	47	30
		0.026	0.145	0.322	0.309	0.197
	C2	3	11	26	33	18
		0.033	0.121	0.286	0.363	0.198
A wide range of students participate in class:	PC	2	6	25	13	11
		0.035	0.105	0.439	0.228	0.193
	C1	6	22	53	43	33
		0.038	0.14	0.338	0.274	0.21
	C2	0	7	22	42	20
		0	0.077	0.242	0.462	0.22

## Comparisons

Generally speaking, do other people in your role for [course] use a teaching style similar to yours?

	Yes	No	Too varied to choose	I don't know
PC	28	4	6	20
	0.483	0.069	0.103	0.345
C1	74	4	27	55
	0.462	0.025	0.169	0.344
C2	43	4	10	36
	0.462	0.043	0.108	0.387

How do you feel about the instructional approach(es) being used to teach [course] at [your institution]?

	Very unhappy	Somewhat unhappy	Neutral	Somewhat happy	Happy
PC	3	1	12	26	17
	0.051	0.017	0.203	0.441	0.288
C1	6	10	29	73	42
	0.038	0.062	0.181	0.456	0.262
C2	2	6	21	36	27
	0.022	0.065	0.228	0.391	0.293

## PIPS: Instructor Survey

The PIPS data contain 457 responses from instructors from twelve universities across the United States. Of those instructors, 186 taught Precalculus, 164 taught Calculus 1, and 107 taught Calculus 2. We first present the self-identified demographic information of these instructors.

As noted in the introduction to this report, instructors responded for each course they were teaching in a particular term. In the identity and context portion of this report, instructors are counted only once per term; in the course-specific information their responses are reported separately for each *course* they were teaching at the time they completed the survey.

### Instructor Identity & Personal Context

These questions asked about instructors' identity, including demographic information and academic context. Questions about Gender, Race and Ethnicity, and Sexual Orientation were presented as "select all that apply" items with the option to self-identify descriptors not on our lists. We intentionally provided more nuanced options than are generally use in demographic reports (e.g., the US census) as we value the complex nature of identity. Responses to these items were recoded for interpretability in this report; details are provided alongside each item.

#### Gender

Do you consider yourself to be (Select all that apply):

Cisgender Man	Cisgender Woman	Gender Non-binary	Transgender	Transgender Man	Transgender Women	Not reported
228	166	5	0	0	0	57
0.5	0.364	0.011	0.000	0.000	0.000	0.125

*Survey response options: Man, Transgender, Woman, Not listed (please specify), Prefer not to disclose.*

*Selections of only Man, only Woman, or only Transgender are coded as Cisgender Man, Cisgender Woman, and Transgender respectively; selections of Transgender and Man or Transgender and Woman are coded as Transgender Man and Transgender Woman, respectively; selections of Man and Woman (with or without additional selections) or self-described non-binary gender identities (e.g., genderfluid, agender) are coded as Gender Non-Binary; selections of Prefer not to disclose and no selection were coded as Not reported.*

#### Race and Ethnicity

Do you consider yourself to be (Select all that apply):

Asian	37 (0.081)
-------	------------

Alaska Native or Native American	4 (0.009)
Black or African American	43 (0.094)
Hispanic or Latinx	17 (0.037)
Middle Eastern or North African	0 (0.000)
Multiple Race	11 (0.024)
Native Hawaiian or Pacific Islander	0 (0.000)
White	265 (0.58)
Not reported	80 (0.175)

*Survey response options: Alaskan Native or Native American, Black or African American, Central Asian, East Asian, Hispanic or Latinx, Middle Eastern or North African, Native Hawaiian or Pacific Islander, Southeast Asian, South Asian, White, Not listed (please specify), Prefer not to disclose.*

*Selections of more than one of Central Asian, East Asian, Southeast Asian, South Asian without any other choices are coded as Asian; selections of multiple responses (aside from the previous) are coded as Multiple Race/Ethnicity; selections of Prefer not to disclose and no selection are coded as Not reported.*

---

## **Sexual Orientation**

Do you consider yourself to be (Select all that apply):

Straight	Gay	Lesbian	Bisexual	Asexual	Queer	Queer+	Straight+	Not reported
321	1	0	2	10	1	1	0	121
0.702	0.002	0.000	0.004	0.022	0.002	0.002	0.000	0.265

*Survey response options: Asexual, Bisexual, Gay, Lesbian, Queer, Straight (Heterosexual), Not listed (please specify), Prefer not to disclose.*

*Categories are based on research from Voigt (2020) where selections of exactly one listed option are not recoded; selections of Straight (Heterosexual) and one or more additional options are coded as Straight+; selections of more than one option but not Straight (Heterosexual) are coded as Queer+; selections of Prefer not to disclose and no selection are coded as Not reported.*

---

## **Additional Context / Identity Markers**

Do you consider yourself to be (Select all that apply):

International Student	113 (0.247)
First-generation college student	105 (0.23)
First-generation higher education	173 (0.379)
Person with a disability	9 (0.02)

English language learner	77 (0.168)
Parent or guardian	160 (0.35)

## Course-Specific Information

This section describes the participants perceptions of their role in Precalculus, Calculus I, and/or Calculus II (it may be the case that one participant taught more than one of the above courses during the semester). Each result will be shown in the order Precalculus, Calculus I, Calculus II.

### Course Decisions

How are most decisions about course content (e.g., syllabi, exams, homework, pacing, grading) made for [course]? Clarify if you wish.

	I make most decisions	I am part of a team that makes most decisions	Someone else makes most decisions
PC	68	83	33
	0.37	0.451	0.179
C1	71	53	34
	0.449	0.335	0.215
C2	50	35	14
	0.505	0.354	0.141

How are most decisions about instructional approach (e.g., use of clickers, group work, active learning) made for [course]? Clarify if you wish.

	I make most decisions	I am part of a team that makes most decisions	Someone else makes most decisions
PC	123	51	11
	0.665	0.276	0.059
C1	116	30	14
	0.725	0.188	0.088
C2	89	9	1
	0.899	0.091	0.01

## Percentages of Class Time

What percent of regular class time in [course], over the whole term, did your students spend... [must total 100]

	n	mean	sd	median
<b>All Instructors</b>				
<i>Working on tasks individually</i>	449	12.65	14.41	10
<i>Working on tasks in small groups</i>	449	15.65	16.50	11
<i>Engaging in whole class discussion</i>	449	13.00	13.30	10
<i>Listening to the instructor lecture or solve problems</i>	449	58.69	22.57	60
<b>Precalculus Instructors</b>				
<i>Working on tasks individually</i>	185	16.78	17.94	11
<i>Working on tasks in small groups</i>	185	15.85	17.55	10
<i>Engaging in whole class discussion</i>	185	12.91	12.76	10
<i>Listening to the instructor lecture or solve problems</i>	185	54.46	22.15	54
<b>Calculus 1 Instructors</b>				
<i>Working on tasks individually</i>	161	9.83	10.68	8
<i>Working on tasks in small groups</i>	161	17.03	16.61	15
<i>Engaging in whole class discussion</i>	161	11.87	12.13	10
<i>Listening to the instructor lecture or solve problems</i>	161	61.27	21.77	64
<b>Calculus 2 Instructors</b>				
<i>Working on tasks individually</i>	103	9.63	10.01	8
<i>Working on tasks in small groups</i>	103	13.15	14.09	10
<i>Engaging in whole class discussion</i>	103	14.95	15.69	10
<i>Listening to the instructor lecture or solve problems</i>	103	62.27	23.51	66

## Classroom Experience

Please indicate the degree to which the following statements are descriptive of your teaching in [course]:

		Not at all descriptive	Minimally descriptive	Somewhat descriptive	Mostly descriptive	Very descriptive
I guide students through major topics as they listen:	PC	2	11	45	64	61
		0.011	0.06	0.246	0.35	0.333
	C1	1	12	32	60	53
		0.006	0.076	0.203	0.38	0.335
	C2	2	4	23	43	29
		0.02	0.04	0.228	0.426	0.287

		Not at all descriptive	Minimally descriptive	Somewhat descriptive	Mostly descriptive	Very descriptive
I provide activities that connect course content to my students' lives and future work:	PC	17	53	58	28	27
		0.093	0.29	0.317	0.153	0.148
	C1	26	41	51	23	18
		0.164	0.258	0.321	0.145	0.113
	C2	19	26	34	16	5
		0.19	0.26	0.34	0.16	0.05
My syllabus contains the specific topics that will be covered in every class session:	PC	16	11	22	40	94
		0.087	0.06	0.12	0.219	0.514
	C1	27	10	31	33	59
		0.169	0.062	0.194	0.206	0.369
	C2	20	9	11	20	42
		0.196	0.088	0.108	0.196	0.412
I provide students with immediate feedback on their work during class (e.g., student response systems; short quizzes):	PC	20	26	33	54	50
		0.109	0.142	0.18	0.295	0.273
	C1	40	40	26	26	28
		0.25	0.25	0.162	0.162	0.175
	C2	22	23	21	18	16
		0.22	0.23	0.21	0.18	0.16
I structure my course with the assumption that most of the students have little useful knowledge of the topics:	PC	13	31	42	58	40
		0.071	0.168	0.228	0.315	0.217
	C1	9	24	45	41	39
		0.057	0.152	0.285	0.259	0.247
	C2	6	18	28	35	15
		0.059	0.176	0.275	0.343	0.147
I use student assessment results to guide the direction of my instruction during the semester:	PC	15	24	50	49	43
		0.083	0.133	0.276	0.271	0.238
	C1	12	22	56	40	29
		0.075	0.138	0.352	0.252	0.182
	C2	5	19	30	24	22
		0.05	0.19	0.3	0.24	0.22

		Not at all descriptive	Minimally descriptive	Somewhat descriptive	Mostly descriptive	Very descriptive
I ask students to respond to questions during class time:	PC	6	3	5	63	104
		0.033	0.017	0.028	0.348	0.575
	C1	2	2	23	45	88
		0.013	0.013	0.144	0.281	0.55
	C2	1	0	12	27	59
		0.01	0	0.121	0.273	0.596
I use student questions and comments to determine the focus and direction of classroom lessons:	PC	10	15	58	60	41
		0.054	0.082	0.315	0.326	0.223
	C1	7	21	51	51	30
		0.044	0.131	0.319	0.319	0.188
	C2	1	14	28	40	19
		0.01	0.137	0.275	0.392	0.186
In my class a variety of means (models, drawings, graphs, symbols, simulations, tables, etc.) are used to represent course topics and/or solve problems:	PC	6	32	98	138	172
		0.013	0.072	0.22	0.309	0.386
	C1	1	11	37	46	65
		0.006	0.069	0.231	0.288	0.406
	C2	0	11	28	29	34
		0	0.108	0.275	0.284	0.333
I structure class so that students explore or discuss their understanding of concepts before direct instruction:	PC	42	42	43	33	22
		0.231	0.231	0.236	0.181	0.121
	C1	35	53	32	18	21
		0.22	0.333	0.201	0.113	0.132
	C2	28	31	23	8	8
		0.286	0.316	0.235	0.082	0.082
My class sessions are structured to give students a clear/structured set of notes:	PC	1	10	20	52	102
		0.005	0.054	0.108	0.281	0.551
	C1	3	17	15	50	74
		0.019	0.107	0.094	0.314	0.465
	C2	1	7	17	29	48
		0.01	0.069	0.167	0.284	0.471

		Not at all descriptive	Minimally descriptive	Somewhat descriptive	Mostly descriptive	Very descriptive
I structure class so that students talk with one another about course topics:	PC	14	38	57	43	29
		0.077	0.21	0.315	0.238	0.16
	C1	18	24	48	38	32
		0.112	0.15	0.3	0.238	0.2
	C2	10	21	27	18	24
		0.1	0.21	0.27	0.18	0.24
I structure class so that students constructively criticize one another's ideas:	PC	62	43	47	18	11
		0.343	0.238	0.26	0.099	0.061
	C1	55	43	30	20	11
		0.346	0.27	0.189	0.126	0.069
	C2	31	29	21	12	6
		0.313	0.293	0.212	0.121	0.061
I structure class so that students discuss their mathematical difficulties with other students:	PC	24	37	60	40	23
		0.13	0.201	0.326	0.217	0.125
	C1	27	27	51	36	18
		0.17	0.17	0.321	0.226	0.113
	C2	20	14	33	19	14
		0.2	0.14	0.33	0.19	0.14
I structure class so that students work on problems individually during class:	PC	10	39	53	44	37
		0.055	0.213	0.29	0.24	0.202
	C1	27	44	42	23	24
		0.169	0.275	0.262	0.144	0.15
	C2	19	28	28	13	14
		0.186	0.275	0.275	0.127	0.137
I structure class so that students work together in pairs or small groups:	PC	29	35	35	47	37
		0.158	0.191	0.191	0.257	0.202
	C1	29	30	37	30	34
		0.181	0.188	0.231	0.188	0.212
	C2	25	23	23	8	22
		0.248	0.228	0.228	0.079	0.218

		Not at all descriptive	Minimally descriptive	Somewhat descriptive	Mostly descriptive	Very descriptive
I structure class so that more than one approach to solving a problem is discussed:	PC	1	7	37	74	61
		0.006	0.039	0.206	0.411	0.339
	C1	1	13	43	70	33
		0.006	0.081	0.269	0.438	0.206
	C2	4	9	28	31	28
		0.04	0.09	0.28	0.31	0.28
I provide time for students to reflect about the processes they use to solve problems:	PC	7	24	60	66	27
		0.038	0.13	0.326	0.359	0.147
	C1	12	26	54	38	29
		0.075	0.164	0.34	0.239	0.182
	C2	4	23	33	26	15
		0.04	0.228	0.327	0.257	0.149
I give students frequent assignments worth a small portion of their grade:	PC	3	11	28	65	78
		0.016	0.059	0.151	0.351	0.422
	C1	10	8	26	52	63
		0.063	0.05	0.164	0.327	0.396
	C2	2	10	17	29	43
		0.02	0.099	0.168	0.287	0.426
I expect students to make connections between related ideas or concepts when completing assignments:	PC	1	4	33	79	67
		0.005	0.022	0.179	0.429	0.364
	C1	3	12	38	71	36
		0.019	0.075	0.238	0.444	0.225
	C2	1	7	23	38	31
		0.01	0.07	0.23	0.38	0.31
I provide feedback on student assignments without assigning a formal grade:	PC	65	42	45	18	12
		0.357	0.231	0.247	0.099	0.066
	C1	61	39	38	6	15
		0.384	0.245	0.239	0.038	0.094
	C2	41	22	20	8	7
		0.418	0.224	0.204	0.082	0.071

		Not at all descriptive	Minimally descriptive	Somewhat descriptive	Mostly descriptive	Very descriptive
Test questions focus on important facts and definitions from the course:	PC	5	19	33	44	82
		0.027	0.104	0.18	0.24	0.448
	C1	2	12	38	44	63
		0.013	0.075	0.239	0.277	0.396
	C2	0	6	24	31	37
		0	0.061	0.245	0.316	0.378
Test questions require students to apply course concepts to unfamiliar situations:	PC	22	50	70	29	14
		0.119	0.27	0.378	0.157	0.076
	C1	21	37	56	22	21
		0.134	0.236	0.357	0.14	0.134
	C2	15	21	39	16	7
		0.153	0.214	0.398	0.163	0.071
Test questions contain well-defined problems with one correct solution:	PC	0	3	17	64	99
		0	0.016	0.093	0.35	0.541
	C1	1	4	17	60	76
		0.006	0.025	0.108	0.38	0.481
	C2	2	3	19	41	38
		0.019	0.029	0.184	0.398	0.369
I use a grading curve as needed to adjust student scores:	PC	69	53	33	14	15
		0.375	0.288	0.179	0.076	0.082
	C1	45	40	27	19	28
		0.283	0.252	0.17	0.119	0.176
	C2	22	22	23	12	20
		0.222	0.222	0.232	0.121	0.202
A wide range of students respond to my questions in class:	PC	12	22	61	62	27
		0.065	0.12	0.332	0.337	0.147
	C1	5	26	68	39	22
		0.031	0.162	0.425	0.244	0.138
	C2	3	13	46	23	17
		0.029	0.127	0.451	0.225	0.167

		Not at all descriptive	Minimally descriptive	Somewhat descriptive	Mostly descriptive	Very descriptive
I know most of my students by name:	PC	9	23	27	29	95
		0.049	0.126	0.148	0.158	0.519
	C1	16	29	20	20	75
		0.1	0.181	0.125	0.125	0.469
	C2	5	14	12	14	56
		0.05	0.139	0.119	0.139	0.554
When calling on students in class, I use randomized response strategies (e.g., picking names from a hat):	PC	105	32	26	8	11
		0.577	0.176	0.143	0.044	0.06
	C1	94	27	19	11	9
		0.588	0.169	0.119	0.069	0.056
	C2	58	15	12	8	5
		0.592	0.153	0.122	0.082	0.051
I structure class to encourage peer-to-peer support among students (e.g., ask peer before you ask me, having group roles, developing a group solution to share, etc.):	PC	20	50	37	44	32
		0.109	0.273	0.202	0.24	0.175
	C1	23	35	42	31	29
		0.144	0.219	0.262	0.194	0.181
	C2	21	22	23	18	16
		0.21	0.22	0.23	0.18	0.16
There is a sense of community among the students in my class:	PC	4	16	64	62	37
		0.022	0.087	0.35	0.339	0.202
	C1	4	15	39	66	35
		0.025	0.094	0.245	0.415	0.22
	C2	1	12	34	30	25
		0.01	0.118	0.333	0.294	0.245
I require students to work in predetermined or randomized groups:	PC	75	27	32	23	23
		0.417	0.15	0.178	0.128	0.128
	C1	81	16	20	13	30
		0.506	0.1	0.125	0.081	0.188
	C2	56	18	13	7	6
		0.56	0.18	0.13	0.07	0.06

		Not at all descriptive	Minimally descriptive	Somewhat descriptive	Mostly descriptive	Very descriptive
I use strategies that have been shown to support students from underrepresented groups:	PC	34	35	54	36	18
		0.192	0.198	0.305	0.203	0.102
	C1	33	38	39	20	23
		0.216	0.248	0.255	0.131	0.15
	C2	24	29	21	10	11
		0.253	0.305	0.221	0.105	0.116
I consider students' thinking/understanding when planning lessons:	PC	6	6	20	84	67
		0.033	0.033	0.109	0.459	0.366
	C1	0	1	27	64	65
		0	0.006	0.172	0.408	0.414
	C2	0	0	16	36	49
		0	0	0.158	0.356	0.485
I use a variety of approaches (e.g., questioning, discussion, formal/informal assessments) to gauge where my students are in their understanding of concepts:	PC	2	9	45	71	56
		0.011	0.049	0.246	0.388	0.306
	C1	3	17	52	46	42
		0.019	0.106	0.325	0.288	0.262
	C2	1	12	28	35	25
		0.01	0.119	0.277	0.347	0.248
I understand students' previous conceptions, skills, knowledge, and interests related to a particular topic:	PC	4	18	51	63	48
		0.022	0.098	0.277	0.342	0.261
	C1	2	16	61	54	27
		0.013	0.1	0.381	0.338	0.169
	C2	1	10	33	33	25
		0.01	0.098	0.324	0.324	0.245
I explain concepts in this class in a variety of ways:	PC	2	3	17	83	77
		0.011	0.016	0.093	0.456	0.423
	C1	1	5	34	65	54
		0.006	0.031	0.214	0.409	0.34
	C2	1	4	18	44	34
		0.01	0.04	0.178	0.436	0.337

		Not at all descriptive	Minimally descriptive	Somewhat descriptive	Mostly descriptive	Very descriptive
I adjust my teaching based upon what students currently do or do not understand:	PC	4	9	41	64	65
		0.022	0.049	0.224	0.35	0.355
	C1	0	7	39	63	51
		0	0.044	0.244	0.394	0.319
	C2	0	4	28	36	34
		0	0.039	0.275	0.353	0.333
I give feedback on homework, exams, quizzes, etc.:	PC	4	8	26	59	87
		0.022	0.043	0.141	0.321	0.473
	C1	7	10	28	41	73
		0.044	0.063	0.176	0.258	0.459
	C2	4	4	9	30	55
		0.039	0.039	0.088	0.294	0.539
I structure class so that students share their ideas (or their group's ideas) during whole class discussions:	PC	17	45	50	46	26
		0.092	0.245	0.272	0.25	0.141
	C1	26	32	47	29	26
		0.162	0.2	0.294	0.181	0.162
	C2	10	26	32	20	13
		0.099	0.257	0.317	0.198	0.129
I use strategies to encourage participation from a wide range of students:	PC	7	11	48	69	50
		0.038	0.059	0.259	0.373	0.27
	C1	8	28	38	44	41
		0.05	0.176	0.239	0.277	0.258
	C2	5	21	28	28	17
		0.051	0.212	0.283	0.283	0.172
A wide range of students participate in class:	PC	7	13	58	72	33
		0.038	0.071	0.317	0.393	0.18
	C1	4	15	60	49	32
		0.025	0.094	0.375	0.306	0.2
	C2	1	15	33	35	18
		0.01	0.147	0.324	0.343	0.176

## Comparisons

Generally speaking, do other [course] instructors use a teaching style similar to yours?

		Yes	No	Too varied to choose	I don't know
Do other [course] instructors use a teaching style similar to yours?	PC	72	13	22	77
		0.391	0.071	0.12	0.418
	C1	57	18	18	64
		0.363	0.115	0.115	0.408
	C2	30	14	12	45
		0.297	0.139	0.119	0.446

How do you feel about the instructional approach(es) being used to teach [course] at [your institution]?

		Very unhappy	Somewhat unhappy	Neutral	Somewhat happy	Happy
How do you feel about the instructional approach(es) being used to teach [course] at [your institution]?	PC	2	15	40	70	56
		0.011	0.082	0.219	0.383	0.306
	C1	1	26	33	65	34
		0.006	0.164	0.208	0.409	0.214
	C2	0	13	28	34	25
		0	0.13	0.28	0.34	0.25

## Acknowledgement & References

### Acknowledgements

We are grateful to the students and instructors across all twelve universities who provided us with descriptions of themselves and their mathematics course experiences.

The authors of this manuscript are a subset of the Progress through Calculus research team. This work would not be possible without the contributions of the PI team (David Bressoud, Jessica Ellis Hagman, Sean Larsen, Chris Rasmussen), the Mathematical Association of America, and a long list of senior personnel and graduate students, including: Estrella Johnson, Naneh Apkarian, Jessica Gehrtz, Kristen Vroom, Dana Kirin, Matthew Voigt, Tenchita Alzaga Elizondo, Brittney Ellis, Antonio Martinez, Rachel Tremaine, Ciera Street, Tyler Sullivan, Jason Guglielmo, Victoria Barron, Colin McGrane, and Kate Yang.

This material is based upon work supported by the National Science Foundation under grant DUE IUSE #1430540. Any opinions, findings, and conclusions or recommendations expressed in this material are those of the authors and project team and do not necessarily reflect the views of the National Science Foundation.
