There are some misprints in the text of our paper [JAP **93**, 410 (2003)]. They are corrected as following. The Poisson equation (5) in the paper should be

$$\nabla_{\mathbf{r}}^2 \Psi(\mathbf{r}, t) = e[n(\mathbf{r}, t) - n_0(\mathbf{r})]/\varepsilon_0, \quad (5)$$

The screen constant  $\kappa$  in the Eq. (8) should be  $\kappa^2 = 6\pi n_0(\mathbf{r})e^2/(aE_f)$ .

There are some misprints in Eqs. (9)-(12), the corrected equations are

$$\left. \frac{\partial f_{\sigma}(\mathbf{R}, \mathbf{k}, t)}{\partial t} \right|_c = 2\text{Im}[\bar{\varepsilon}_{\sigma-\sigma}(\mathbf{R}, \mathbf{k}, t)\rho_{-\sigma\sigma}(\mathbf{R}, \mathbf{k}, t)] \quad (9)$$

$$\begin{aligned} \left. \frac{\partial \rho_{\sigma-\sigma}(\mathbf{R}, \mathbf{k}, t)}{\partial t} \right|_c &= -i[\bar{\varepsilon}_{\sigma\sigma}(\mathbf{R}, \mathbf{k}, t) - \bar{\varepsilon}_{-\sigma-\sigma}(\mathbf{R}, \mathbf{k}, t)]\rho_{\sigma-\sigma}(\mathbf{R}, \mathbf{k}, t) \\ &\quad -i\bar{\varepsilon}_{\sigma-\sigma}(\mathbf{R}, \mathbf{k}, t)[f_{-\sigma}(\mathbf{R}, \mathbf{k}, t) - f_{\sigma}(\mathbf{R}, \mathbf{k}, t)] \end{aligned} \quad (10)$$
