In the preprint [1] M. V. Chermisin noticed that some results (namely Fig. 4) of our recent work [2] have been taken from his paper [3]. As clear from the caption to Fig. 4 as well as from the text of our paper [2], we did not consider the curves shown in that Figure as our original results, but emphasized that they have been obtained in the well known paper [4] 30 years ago [5]. It is a surprise, that M. V. Chermisin presents the 30-years-old results of Chiu and Quinn as his own results, obtained for the first time in [3].
